1. Course Overview

Provider: CORPORATE SCHOOL

Location: In-Person (Melbourne, Australia) & Online

Duration: 8 weeks (Part-Time)

Delivery Mode: Hybrid (In-person and virtual classroom)

2. Course Schedule & Duration

The Data Analysis with Python course runs for **8 weeks** with **two sessions per week**. Each session is **3 hours long**, combining theory, hands-on exercises, and real-world case studies.

Weekly Schedule:

- **Mondays & Wednesdays:** 6:00 PM – 9:00 PM (AEST)
- **Bonus Online Q&A Session:** Saturdays 10:00 AM – 11:30 AM (Optional)

Course Breakdown:

- **Week 1:** Introduction to Python for Data Analysis
- **Week 2:** Data Manipulation with Pandas
- **Week 3:** Data Visualization with Matplotlib & Seaborn
- **Week 4:** Working with Databases using SQL & Python
- **Week 5:** Data Cleaning and Preprocessing
- **Week 6:** Exploratory Data Analysis (EDA)
- **Week 7:** Introduction to Machine Learning with Scikit-Learn
- **Week 8:** Capstone Project & Final Presentation

3. Course Description

The **Data Analysis with Python** course provides a comprehensive introduction to data analysis using Python. Participants will learn how to manipulate, visualize, and analyze data using powerful Python libraries such as Pandas, Matplotlib, Seaborn, and Scikit-Learn.

Key Learning Outcomes:

- Master Python basics for data analysis
 - Perform data manipulation with **Pandas**
 - Create compelling data visualizations with **Matplotlib & Seaborn**
 - Work with **SQL databases** for data extraction and analysis
 - Understand **data cleaning and preprocessing techniques**
 - Conduct **exploratory data analysis (EDA)**
 - Gain an introduction to **machine learning for predictive analytics**
 - Complete a **real-world capstone project**
-

4. Course Fees

- **In-Person (Melbourne): AUD \$2,800** (Includes printed materials, refreshments, and access to networking events)
 - **Online: AUD \$2,500** (Includes digital materials and live online support)
 - **Early Bird Discount:** 10% off for enrollments before [date]
 - **Corporate Group Discounts Available**
-

5. Target Students

This course is ideal for professionals and students who want to build data analysis skills using Python. Suitable for:

- Data Analysts & Business Analysts
 - Software Developers & Engineers
 - Financial Analysts & Economists
 - Researchers & Academics
 - Anyone looking to transition into a Data Science career
-

6. Course Modules

1. **Introduction to Python & Jupyter Notebooks** – Understanding Python basics for data analysis.

2. **Data Manipulation with Pandas** – Cleaning, transforming, and analyzing data efficiently.
 3. **Data Visualization** – Creating insightful charts and dashboards with Matplotlib & Seaborn.
 4. **SQL for Data Analysis** – Extracting and analyzing data from databases.
 5. **Data Cleaning & Preprocessing** – Handling missing data, outliers, and inconsistencies.
 6. **Exploratory Data Analysis (EDA)** – Identifying patterns and trends in data.
 7. **Machine Learning Basics** – Understanding simple models for predictive analytics.
 8. **Capstone Data Project** – Applying acquired skills in a real-world scenario.
-

7. How to Enroll

Enroll today via our website: www.corporateschool.com.au or contact us at info@corporateschool.com.au for more details.

Enhance your data analysis skills with **Python** and make data-driven decisions with CORPORATE SCHOOL!
