1. Introduction

Course Overview

At *CORPORATE SCHOOL*, we are proud to offer the *Design Thinking Course*, which empowers professionals to solve complex problems through creative and human-centered approaches. Design Thinking is a solution-based approach to solving problems that emphasizes understanding the user's needs, redefining problems in human-centric ways, and testing solutions through prototyping.

This course will teach you the key principles of Design Thinking, its five phases (Empathize, Define, Ideate, Prototype, and Test), and how to apply this methodology in real-world business settings. Whether you are a product manager, a team leader, or a business strategist, this course will equip you with practical skills to innovate and drive positive change in your organization.

Target Audience

The *Design Thinking Course* is ideal for:

- **Product managers and designers** looking to enhance their problem-solving and innovation skills.
 - **Business leaders and strategists** seeking to build customer-centric solutions and drive business growth.
 - **Project managers** responsible for developing innovative products and services.
 - **Entrepreneurs and startups** that need to build user-centered solutions from the ground up.
 - **Employees at all levels** who want to learn a structured, creative approach to problem-solving and innovation.
-

2. Course Description

What You Will Learn

This course introduces you to the principles and practices of Design Thinking, providing both theoretical knowledge and practical skills. You will learn how to:

- **Empathize with users:** Understand user needs through research and observation.
- **Define the problem:** Learn how to clearly articulate the problem you are trying to solve.
- **Ideate innovative solutions:** Use brainstorming and other ideation techniques to generate creative solutions.
- **Prototype solutions:** Learn to develop low-cost, quick prototypes to visualize your ideas.
- **Test and refine solutions:** Use feedback from testing to iterate and improve your ideas.

You will also gain experience in applying these principles to real-world case studies and group exercises, ensuring that you can take the knowledge you gain and apply it directly in your work.

Course Benefits

- **Practical, Hands-On Learning:** Engage in activities that teach you how to apply the Design Thinking methodology to solve real problems.
 - **User-Centered Focus:** Learn how to always keep the user's needs at the forefront of your decision-making process.
 - **Innovation Skills:** Improve your ability to think creatively and innovate within your organization.
 - **Collaboration:** Work with other professionals to develop solutions in group settings, mirroring the collaborative environment that is at the heart of Design Thinking.
 - **Improved Problem-Solving:** Gain tools to tackle complex, ambiguous challenges in a structured, systematic way.
-

3. Course Schedule

Duration

The *Design Thinking Course* is a **4-day program**, offered in both in-person and online formats. Each day is packed with interactive lectures, group activities, and case studies to ensure that participants not only understand the theory but also gain practical, hands-on experience.

In-Person Course Schedule:

- **Location:** 50 Innovation Street, Melbourne, Victoria, Australia
- **Dates:** Monday to Thursday, 9:00 AM to 4:00 PM each day.

Online Course Schedule:

- The online version follows the same schedule and format, with live webinars, interactive group activities, and real-time feedback from instructors.

Detailed Weekly Schedule

Day 1: Introduction to Design Thinking

- Morning: What is Design Thinking? Overview of its 5 Phases.
- Afternoon: Empathy Phase – Understanding the User through Research and Interviews.

Day 2: Define & Ideate

- Morning: Defining the Problem – How to Synthesize User Insights into a Clear Problem Statement.
- Afternoon: Ideation Techniques – Brainstorming, Mind Mapping, and Conceptualizing Ideas.

Day 3: Prototyping

- Morning: Prototyping – Creating Quick, Low-Fidelity Prototypes.
- Afternoon: Hands-on Exercise – Building and Presenting Prototypes.

Day 4: Test & Implement

- Morning: Testing – Gathering Feedback and Iterating on Your Prototypes.
 - Afternoon: Implementing Design Thinking in the Real World – How to Apply Design Thinking to Your Organization.
-
